### PREMIUM EBAY LISTING TEMPALTE

#### [Listing template]

eBay listing guidelines has changed significantly over the last few years.

We have already gone through active content changes and we have been

working closely with UK eBay sellers to implement changes, making

listings compatible with eBay rules. A few months ago, we were

approached, by a Northampton based manufacturer, to update their eBay listing design. Our key

role involved redesigning and creating a listing template tool.

#### Our Process

Our eBay design specialist reviewed the current design and gathered information about what they

would like in their eBay listing. Once all the information is gathered we went through a design

process and developed some drafts for approval. Following this we created a bespoke eBay store

design and listing. All our eBay stores have a bespoke design to suit your brand identity.

Additionally, we were tasked to create an independent listing builder, so for all future listings can

be applied with this bespoke template. This editor and all eBay store design files were hosted on

the client's server giving them 100% control.

#### Key things about our store design

- EBAY COMPATIBLE: Our design is eBay compatible
- UNIQUE: Our design work is unique and based on client needs.
- 100% CONTROL: All files are hosted on client server.
- MOBILE RESPONSIVE: All designs are responsive to mobile.
- BUILDER: Builders help create new listings with existing template with any external help.
- VIDEO: Template with video gives unique opportunity to sell
